Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The examiner notified applicant's representative that USPAT 5,870,156 is vague about the diffuser having a rougher surface either on the light output side or the light input side. However, as shown in USPAT 6,044,196 a diffuser is known to have a rougher surface on either the light output side or the light input side. Therefore, according to the examiner the claim as it stands still unpatentable.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)
